

Do you have an infant younger than 14 days old?

Every mom should have access to premium nutrition for their baby. Bubs Australia wants to work with you to make it happen. You may be eligible for our clinical study if you have an infant.

Join this clinical trial now for:

No cost infant formula for up to 6 months

Up to \$300 in compensation

6 supervised visits over 16 weeks

validcare.com/bubs-gms/

● HOW DO I PARTICIPATE?

1- Fill out our Form

Click on apply and complete the pre-screening form. Eligible participants will receive an email with instructions on how to proceed.

2- Feed Your Baby

Based on random selection (like flipping a coin), we'll provide one of the three study products or an existing cow milk infant formula at no cost. You will receive it immediately upon your baby's enrollment visit, and at each follow up visit throughout the study.

3- MEASURE GROWTH

On a scheduled basis, you will visit a study doctor to have your baby's growth measured and to check on your baby's progress over 16 weeks. Daily tasks can be completed in the comfort of your own home via our study app.

● ABOUT OUR STUDY

What is the purpose of the study?

The goal of this study is to demonstrate that babies fed Bubs infant formula grow at the same rate as those fed a commercially available cow milk formula. Such a study is a requirement by the FDA to allow a new infant formula into the USA market. The study also includes a group of breastfed babies.

How long will I participate?

You and your baby will be in the study for up to 18 weeks, including enrollment and training. Once you have registered, you will be asked to occasionally visit a study doctor for growth measurements 6 times over a 16 week period.

What is the compensation for my participation?

The total compensation for completing the study is \$300 spread out over six payments. Participants receive payment after completion of each visit with a study doctor. Formula feeding parents who successfully complete the study, will receive a complimentary two-month supply of the study formula.
